RECEIVER LISTS BICKART'S ASSETS

Report and Inventory Filed in National Fruit Products Company.

Accounts receivable by the National Fruit Products company, due from practically every state in the Union, total \$28,184, and with accounts in suspense \$47,152.89, according to a report and inventory filed in federal court late Thursday by Omar L. Jewell, receiver. In addition, the receiver reports the collection of \$10,979.23 and an expenditure in administering the affairs of the company \$477.17.

The report states the books of the company show little other than a list of debtors and amount of indebtedness, and contain no report of stock or subscription or payment therefor. The accounts receivable, the receiver sets out, were too uncertain to be placed in the report. They were attached thereto. No appraisal of the real estate has been made, the report says, although the bank of Commerce holds a mortgage on part of the property.

In litigation are a number of claims of the company against Charles H. Bickart, former president, and the receiver says he has brought suit against Bickart in chancery court. John E. McCall, Jr., has been appointed assistant to the receiver and his appointment confirmed by Judge McCall.

The real estate consists, the report shows, of property at 127 to 137 South Fifth street, together with a three-story building located thereon.

In his report to the court of action in the case of the United States against Charles H. Bickart, Omar L. Jewell, receiver for the company, recites the actions from the time of his appointment up to the present time. The report alleges Bickart has removed himself from the jurisdiction of the court and is concealing himself and the property and is about to fraudulently dispose of it. Action taken to seize the more than \$200,000, it is alleged, believed to have been removed to New York by Bickart, was also reported.

Judge McCall entered an order approving the action of the receiver.
